MUSKAN VIJAY

Python Backend Developer | AI Integration | Test Automation

Karachi, Pakistan | muskanvijay171@gmail.com | LinkedIn | GitHub

SUMMARY

Computer Science graduate (SZABIST Karachi, 2026) who builds Python backends with FastAPI and PostgreSQL, AI features with the Gemini API, and automated tests with Playwright and Postman. Seeking a junior Python/backend developer role, an SQA engineer role, or an internship.

SKILLS

Languages:	Python, JavaScript, TypeScript, Java, SQL
Backend:	FastAPI, Django, Flask, Node.js, REST APIs, Authentication, SQLAlchemy, Pydantic
Databases:	PostgreSQL, MySQL, Firebase, Redis
AI and Data:	Gemini API, LangChain, RAG, Prompt Engineering, Pandas, NumPy, Scikit-learn
Testing:	Playwright, Postman, Newman, pytest, Page Object Model, Regression and Smoke Testing
Frontend:	React, React Native, Tailwind CSS, HTML5, CSS3
Tools:	Git, GitHub, GitHub Actions, Docker, Linux, Jira, Agile/Scrum
Learning now:	AI automation (n8n), LLM engineering, AI agents, machine learning

PROJECTS

LinkHub: Social Media Management Platform (Final Year Project) *Node.js, React, PostgreSQL, Gemini AI*

- Built a full-stack platform to create and publish posts to Facebook, Instagram, LinkedIn, and Threads from one screen, with per-platform customization.
- Integrated Gemini AI to generate captions from a media description. Developed a content calendar, analytics dashboard, unified inbox, and role-based admin approvals.

Smart Document Intelligence and Workflow Automation *Python, FastAPI, PostgreSQL, OCR, NLP, Docker*

- Built a backend system that extracts structured data from invoices and purchase orders, with validation, duplicate detection, and approval workflows.
- Designed REST APIs for document upload, processing, and workflow management, and containerized the system with Docker.

API Observability and Incident Analysis Platform *Python, FastAPI, PostgreSQL, Redis, Docker, pytest*

- Monitors API availability, response times, and recurring failures with scheduled health checks and incident tracking, exposed through REST endpoints with pytest coverage.

Automated Data Quality and Validation Platform *Python, FastAPI, Pandas, PostgreSQL, pytest*

- Analyzes uploaded CSV/Excel files for missing values, duplicates, invalid formats, and outliers, with configurable validation rules, report-generation APIs, and automated tests.

AI Travel Planner *React Native, Gemini AI, Firebase, Weather API*

- Built a cross-platform mobile app that generates personalized itineraries from budget, interests, and preferences using Gemini AI, with real-time weather data.

QA Automation Projects *Playwright, TypeScript, Postman, GitHub Actions*

- Built an end-to-end Playwright framework (Page Object Model) covering registration, login, cart, and checkout, including positive, negative, and edge cases.
- Automated REST API tests in Postman/Newman validating status codes, headers, schemas, and CRUD operations. Ran Playwright tests on every push and pull request with GitHub Actions.

Other projects: PDF Editor Tool (JavaScript, PDF-lib, Canvas API); Digital Immune System Monitor (Python, Scikit-learn, Power BI).

EXPERIENCE

IT Department Intern, Wateen Telecom Limited, Karachi *Jul 2025 – Sep 2025*

- Completed an 8-week internship in the IT department, gaining exposure to IT operations and team workflows in a telecom environment.

EDUCATION

BS Computer Science, SZABIST Karachi CGPA 3.3 / 4.0 *2022 – 2026*

Intermediate, The Govt Girls College 76% *2018 – 2020*

CERTIFICATIONS AND OTHER

Google Advanced Data Analytics • Google AI Essentials • Python for Data Science (Simplilearn) • Node.js Development (Simplilearn) • Prompt Engineering (Coursera) • Python (Coursera) • JavaScript Algorithms (KG Coding)

Creates educational coding lectures on YouTube (slide-based videos with AI narration).
